

THE BEST PERFORMANCE IN MEDIUM AND LOW POWER TV TRANSMITTERS

The ICE series of digital terrestrial TV transmitters, gapfillers and transposers now covers powers from 2000W to 75W rms

The main characteristics can be summarized:

- **Maximum efficiency.** Doherty UWB and fine adjustment.
- **Minimum size.** Up to 150W in 1RU and 350W in 2RU, 600W in 4RU, 1000W in 7RU and 2000W in 13RU
- **Fully connected.** IP, WIFI and 3G.

As well as other multiple advantages for the end customer such as power supplies redundancy, IMD and MER signal quality measurement, efficiency adjustment, improved echo canceller with double cancellation window to combat multipath, adapted to ATSC, DVB, ISDB-Tb standards, ...

We are waiting for you at our stand N4824.
